CAREER OBJECTIVE

An enthusiastic final year student of Computer Science and Engineering, passionate about learning emerging technologies and contributing to real-world projects in software development and data-driven problem solving.

EDUCATION

DRIEMS UNIVERSITY, TANGI CUTTACK	Oct 2022 – May 2026
B.Tech. in Computer Science Engineering	CGPA: 9
Shailabala Women's College, Cuttack	Jun 2020 – Jul 2022
Higher Secondary	
Sri Sathya Sai School, Cuttack	Jun 2020
Matriculation	

SKILLS

Languages: Python, SQL

Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib, Regression, Seaborn

Tools: Power Bi, Tableau, MySQL, MS Excel, MS PowerPoint

Platforms: Jupyter Notebook, VS Code

Soft Skills: Communication, teamwork, leadership, and time management

INTERNSHIP

CTTC (Central Tool Room & Training Centre) — *Data Analytics Intern*

1 Month

- Integrated data from multiple sources (Excel, CSV, SQL, etc.) into Tableau for end-to-end reporting solutions.
- Automated data cleaning, transformation, and visualization processes in Excel using advanced formulas, pivot tables, and charts.
- Ensured data accuracy and performance optimization by implementing calculations, filters, and hierarchies in Tableau.
- Presented dashboards and insights to management, enabling data-driven decision making.

CTTC (Central Tool Room & Training Centre) — AI/ML Intern

1 Month

- Developed and trained multiple machine learning models (e.g., Linear Regression, Logistic Regression, SVM, Naive Bayes) for predictive analytics and classification tasks.
- Implemented data preprocessing techniques including feature scaling, encoding, and missing value treatment to improve model accuracy.
- Conducted exploratory data analysis (EDA) using Python (Pandas, NumPy, Matplotlib, Seaborn) to extract meaningful insights from raw datasets.
- Used deep learning frameworks (TensorFlow, Keras) to build neural network models.

PROJECTS

Global Street Food (Excel as well as Tableau)

1 Month

- Designed and developed an interactive Tableau dashboard showcasing insights on global street food trends, regional preferences, and cuisine diversity.
- Collected, cleaned, and organized large datasets in Microsoft Excel using advanced functions, pivot tables, and data validation techniques.
- Created visual storytelling through dynamic charts, filters, and maps to highlight country-wise popularity and pricing of street foods.
- Utilized data visualization best practices to enhance clarity, interactivity, and user engagement.

HR Sales Analysis (Microsoft Power BI)

1 Month

- Developed an interactive Power BI dashboard to analyze HR and sales performance metrics, including employee productivity, regional sales, and revenue trends.
- Cleaned and transformed raw data using Power Query to ensure data accuracy and consistency.
- Created dynamic visuals such as KPI cards, slicers, bar charts, and trend lines to enable actionable insights for management.
- Implemented filters, drill-throughs, and hierarchies to improve dashboard interactivity and user experience.
